

DARTS Distribution Systems for Food and Beverage Distribution

The Right Products
At The Right Price
At The Right Time
To The Right Customer

End to End
The Most Efficient Distribution System

The benefits of new technology and the power of middle ware to support management and operations are two of the most significant and differentiating components of the DARTS Distribution Systems. Over the years route distribution systems have largely remained unchanged due to lack of innovation and cost prohibitive technology. Skeye Systems breaks through the decades-old legacy systems ceiling by investing in the benefits of new technology, industry knowledge, and powerful middle ware solutions designed to advance distribution operations into the twenty-first century. Hardware independent, the systems inherent design flexibility allows your business to continue to capitalize on its distinct competitive advantages by conforming to your proven and unique methods. Backed by industry knowledgeable and highly proficient development and support staff, the system arms your personnel with the tools needed for your business to succeed in today's highly competitive food and beverage marketplace.....from hand held operations to middle ware reporting and analysis, DARTS Distribution Systems offer a complete package for your business to effectively compete, prosper and grow.
